From: Joseph Slevnik
RE: Illinois Section Trustee Report
Date: May 11, 2007

The following is a summary of Illinois Section activities since the January 25 & 26, 2007 CSWEA Executive Committee Meeting at the Madison Concourse Hotel in Madison, WI.

1. The Laboratory Committee has scheduled and mailed out information for a Lab Workshop for Wednesday, June 20, 2007 at the Courtyard Banquets in Warrenville, IL. This hands-on workshop is limited to the first 50 attendees, and will feature Paul Gauger of Hach Company and Gil Ditcher from IDEXX Laboratories. Paul's presentation will include the use of Hach TNT Plus vial chemistries for the analysis of COD, Chromium VI, Ortho and Total Phosphorus, in addition to other analytes. Gil's presentation will feature Colilert, Colilert-18, and Quanti-Tray methods for the detection of E. coli and enterococci in final effluent for NPDES compliance.
2. Planning is underway for the Illinois Section Annual "Quick Talks". Quick Talks are 15-20 minute talks for plant operations and maintenance personnel, which share information on projects, studies, or process control strategies that they have tried. The Quick Talks are tentatively scheduled for late July or August 2007. Evaluation of various speakers is currently under way, along with contacting Illinois Section member to host the event.
3. The Safety Committee has begun their preliminary preparations for the 2nd Annual Maintenance and Safety seminar. The event is scheduled for this fall.
4. Paul Ruscko stepped down as Illinois Section Membership Committee Chair earlier this year due to other commitments. The section is still looking for someone to fill this vacancy.
