

PURPOSE OF ORGANIZATION

1. To educate and increase public awareness of protecting and conserving our water resources.
2. To encourage and allow student participation in professional organizations relating to their career choice(s).
3. Promote the Water Environment Technologies Program, St. Cloud Technical College and the students as leaders in education and training for the future leaders in our industries.
4. To promote honesty, integrity, values and ideals that have come to be expected by the communities we serve and reside in.
5. To encourage student participation in school, programs and community activities.
6. To assist each other, openly share information, and solve problems in a spirit of cooperation and fellowship.
7. To generate appropriate revenue to support student member programs and services.
8. To create partnerships with other programs, students, the local community, industrial supporters and other water stakeholders.
9. To promote prudent and responsible organizational strategies to increase the effectiveness of water and wastewater organizations.
10. To develop skills required to be successful in a career including cooperation, communication, teamwork and responsibility.
