Subject: 2018 CSWEA Education Seminar Display Board Displays

The Central States Education Committee invites you to participate in the display board exhibits at the upcoming Central States Education Seminar. This is an annual one-day specialty seminar scheduled for April 10, 2018, at the Monona Terrace near the University of Wisconsin campus in Madison, Wisconsin. The topic for this year's seminar is: **BIOSOLIDS: GENERATING VALUE THROUGH INNOVATION**

As a loyal supporter of the Central States WEA in the past and we would be pleased to have you exhibit a display board at this seminar. Your display board will be exhibited in a prominent and accessible location during the seminar. The seminar provides ample time for attendees to view the display boards at breaks during technical presentations and during an extended lunch period. These networking opportunities have been valuable to attendees at our previous seminars and your display board will help to enhance them. If you desire, your display board can also be exhibited at the seminar's Meet and Greet where speakers and attendees have the opportunity to chat the evening before the seminar.

A brochure describing the seminar and a Display Board Registration Form can be found on the Central States web site (cswea.org). Please follow the instructions in the brochure for registering for the seminar. Please note final selection of the boards to be displayed will be made by the seminar Committee with consideration for applicability to the seminar topic the main determinate. To register your display board, send the completed Display Board Registration Form and the accompanying fee to my attention at the address listed, form may also be e-mailed.

Please contact me for any additional information you may need at 262-617-3870.

Sincerely,

A handwritten signature in black ink that reads "Bryan Davis". The signature is written in a cursive, flowing style.
