journey into a...

BRAVE BLUE WORLD

# TOGETHER we can drive CHANGE

The **Water Environment Federation** (WEF) and **Central States Water Environment Association** (CSWEA) invite you to the University of Minnesota's **Civil Engineering Building**, Room 210 for a screening of **Brave Blue World**, a feature-length documentary that examines how new technologies and innovations can create a sustainable water future.

As a production partner, the Water Environment Federation and WEF and our members will use the film to raise public awareness about the solutions to water challenges.

WEF has made this film available to demonstrate that there are many opportunities for a rewarding career providing healthful water for people and assuring a healthy water environment for everyone.

After the screening, CSWEA will host a panel discussion featuring local water industry employers. University seniors are especially encouraged to attend.

**October 12, 2021,  
6:30 P.M.  
University of  
Minnesota  
Civil Bldg. 210.**

**Registration  
opens at 6:05.**

**Register here**
