Essay Topic: Water Careers

There are many rewarding careers that help conserve and protect our water. Some of these jobs include:

- Laboratory Technician
- Utility Manager/ Supervisor
- Wastewater Collections Operators
- Drinking Water Treatment
- Professional Engineer
- Academic Researcher
- Mechanic or Electrician
- Wastewater treatment operator

Using WEF <https://www.workforwater.org> career site or other resources select a career in the water sector and either research or write as if you are in a day in the life of that job. Your essay should describe the following aspects of the career:

Responsibilities

- What is the main objective of the career ?
- What are the day to day tasks?

Qualifications

- What education is required
- What certifications, licenses, or other training is required?
- What tools, softwares, or procedures must the worker be trained in?

Importance

- Why is this career important to protect water?
- How might the quality and availability of water change if this role didn't exist?

ESSAYS SHOULD BE SUBMITTED NO LATER THAN **MAY 1, 2025** TO THE FOLLOWING WEBSITE:
